TECHNICAL SKILLS

LANGUAGES & CORE

TypeScript · JavaScript (ES6+) · Dart · Java (OOP) · SQL

WEB & MOBILE

React.js · Flutter 3 · Riverpod · Vite · Tailwind CSS · HTML5 / CSS3

BACKEND & DATABASE

Node.js · Express.js · MongoDB Atlas · MySQL · REST APIs

TESTING & DEVOPS

Vitest · Git & GitHub · Vercel · Netlify

LANGUAGES

Amharic	Native
English	Proficient
Afaan Oromo	Proficient

FOCUS AREAS

- Full-Stack Web Engineering
- Cross-Platform Mobile Apps
- Test-Driven Development
- Distributed Cloud Architecture

PROFILE

Senior Software Engineering student (4th Year) at Adama Science and Technology University (ASTU), specializing in scalable full-stack web platforms, cross-platform mobile systems (Flutter), and cloud-backed architectures. Experienced in building production-ready applications with **TypeScript, React, Flutter, Node.js, Express, and MongoDB Atlas**, with a strong focus on automated testing (Vitest), modular component design, and responsive UX. Disciplined in engineering clean, maintainable systems and eager to contribute to high-impact engineering teams.

EDUCATION

B.Sc. in Software Engineering (Senior / 4th Year) — 2023 – Present (Exp. 2027)
Adama Science and Technology University (ASTU) · Adama, Ethiopia

Ethiopian University Entrance Certificate — 2022
National Examination Board · Ethiopia

ENGINEERING PROJECTS & EXPERIENCE

TemariHub — STEM Academic & Opportunity Engine — 2026

React · Vite · Node.js · Express · MongoDB Atlas · Vitest · 125+ Tests

- Architected a centralized STEM opportunity platform for Ethiopian students featuring categorized listings, real-time deadline indexing, and full-text search.
- Engineered automated test suites using Vitest spanning 125+ unit and integration tests with strict CI validation and sub-second execution.

Lehulu — Local Services & Artisan Marketplace — 2025 – 2026

Flutter 3 · Dart · Riverpod · Node.js · Express · MongoDB Atlas · Mobile & Web

- Built a cross-platform mobile marketplace connecting households with verified local service technicians and artisans.
- Integrated geospatial service discovery, direct quote negotiation workflows, and reactive state management powered by Riverpod.

Revola — Next-Gen Music Streaming Experience — 2025

React · TypeScript · Tailwind CSS · Web Audio API · Featured UI

- Engineered a high-performance audio streaming client featuring interactive real-time waveform visualizers, dynamic playlists, and zero-latency playback.
- Designed an ultra-modern dark glassmorphism interface with fluid micro-interactions and comprehensive keyboard navigation.

AdamaMaterials — Construction E-Commerce Platform — 2025

TypeScript · React · Context API · Tailwind CSS · E-Commerce

- Engineered a full-featured marketplace for building materials with strict TypeScript type definitions, live price filters, and instant cart updates.
- Optimized bundle size and render performance with client-side caching and debounced catalog search.

Java Multi-Client Group Chat Application — 2024

Java Core · TCP Sockets · Multithreading · Java Swing GUI · Desktop System

- Built a concurrent multithreaded TCP socket server handling multiple simultaneous client sessions with message broadcasting and connection safety.
- Designed a clean Java Swing desktop GUI with live client lists, user join/leave notifications, and synchronized chat logs.

CORE COMPETENCIES

Frontend & Mobile: React, Vite, TypeScript, Flutter 3, Dart, Riverpod, Tailwind CSS, Responsive Web Architecture

Backend & APIs: Node.js, Express.js, RESTful API Design, Middleware Architecture, Socket.IO / WebSockets

Databases & Cloud: MongoDB Atlas, Mongoose, MySQL, Relational Schema Normalization, Vercel, Netlify

Quality & Tools: Vitest, Test-Driven Development (TDD), Git, GitHub, IntelliJ IDEA, VS Code, Agile Sprints
